## TRAVERTINE

---

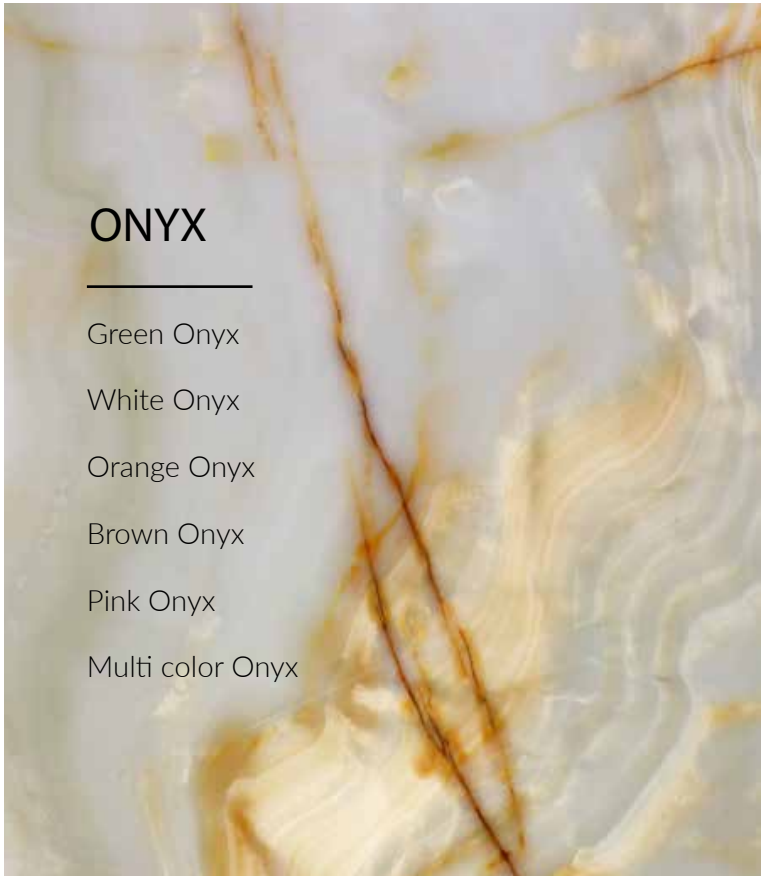

Cream Travertine  
Beige Travertine  
Red Travertine  
Yellow Travertine  
Silver Travertine  
Walnut Travertine

## MARBLE & LIMESTONE

---

Cream Marble  
Green Marble  
Pietgrey Marble  
Pink Marble  
Abadeh Marble  
Botochine Marble  
Gohare Limestone  
Samiram Limestone

## ONYX

---

Green Onyx  
White Onyx  
Orange Onyx  
Brown Onyx  
Pink Onyx  
Multi color Onyx

## GRANITE

---

Natanz Black Granite  
Nehbandan Granite  
Natanz white Granite  
Khoramabad Granite  
Morvarid Granite

## Iran Stone Consortium

here in ISC we have enormous potential, natural advantages and more than 30 years of professional management experience and skilled to bring an elegant transformed version of nature as a masterpiece to all natural stone lovers around the globe. With 30 years of experience in stone industry (Quarrying, Exporting and Manufacturing of Tile, Slabs & Blocks) and capacities listed below gathered to present the elite work to all.

At ISC. It is also our privilege to own a variety collection of most beautiful natural sources of Marble, Onyx and Travertine. (15 Quarries listed below)

### Factories

- 1- Fully equipped factory in Kerman.
- 3- Two fully equipped factory in Tehran.
- 5- Fully equipped blocks & slabs warehouse in Tehran.

- 2- Fully equipped factory in Esfahan.
- 4- Fully equipped factory in Qom.

### Quarries

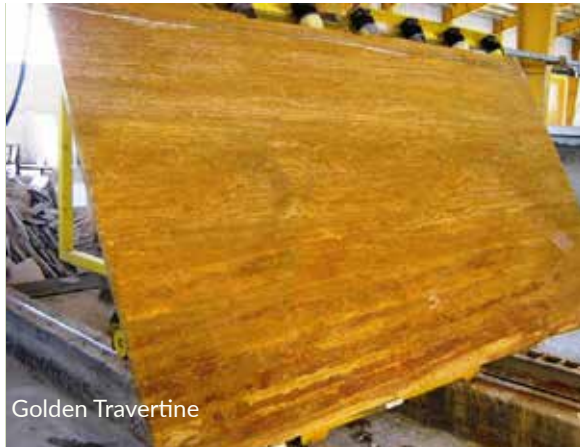

- 1- Black Natanz granite.
- 3- Brown Natanz Marble
- 5- Takab Cream Marble.
- 7- Kerman Multi Cream Marble.
- 9- Seattle Green Marble.
- 11- Esfahan Imperial Marble.
- 13- Khoy Travertine.
- 15- Olive Travertine Jonathan Doe

- 2- Cream / Beige Esfahan Travertine.
- 4- Cream Lime Stone Samirom.
- 6- Esfahan Grey Marble
- 8- Cream/Beige Namin Marble.
- 10- Abbaddeh Cream Marble.
- 12- Khoy Cream Marble.
- 14- Silver travertine.

# TRAVERTINE

It has a lineal (veincut) or concentric (crosscut) appearance and mainly comes in cream coloured and tan varieties. We also have a new range with darker veins. Travertine is a great choice for flooring and can be used both inside and outside your home.

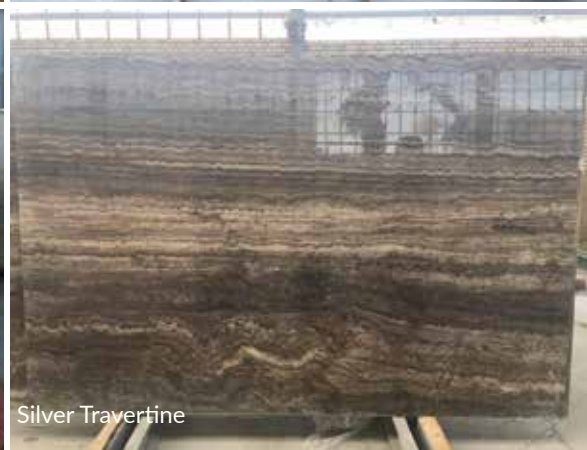

Golden Travertine

Cream Light Travertine

Brown travertine

Silver Travertine

# TRAVERTINE

Travertine is a banded, compact variety of limestone commonly formed along streams, where there are waterfalls or around hot or cold springs. The holes in travertine were created by carbon dioxide bubbles that were trapped when the stone formed. This gives it an open texture that can be filled or left in its natural state.

Cream Travertine

Walnut Travertine

Silver Dark Travertine

Red Travertine

# MARBLE & LIMESTONE

Marble with its inherent warmth, adds a sophisticated element to the area in which it is installed making it a very a popular compliment to modern interiors.

Limestone is a sedimentary rock that has been formed over millions of years at the bottom of lakes and seas. Often limestone can be found with fossils (e.g. Jura limestone which clearly shows the sedimentary nature of the material.) Limestones vary in hardness (density) depending on their age and formation.

The softer limestones are often used for carving of fireplace surrounds and art works. Although not as durable as granite, limestone can be maintained well. Their soft natural beauty and colours are very popular in complimenting our modern interiors.

Samirom limestone

Cream Limestone

Black Bronza Marbles

Seattle green Marble

# MARBLE & LIMESTONE

Marble is a metamorphic rock found in the mountainous regions of many countries of the world. Marble quarried in Iran, India, China, Italy, Turkey and Spain represents the majority of marble, in terms of volume, that is utilized worldwide. Because of its beauty and elegance, marble is a popular choice for countertops, floors, foyers, fireplace facings, fire hearths, walls, and windowsills. Many marbles are well suited for wet area application, which extends the versatility of this material to include baths and showers.

The calcite crystal is the basic building block of true marbles. The calcite crystal is vulnerable to attack by mild acids, including those commonly found in kitchen and bar settings, so although not ruled out completely, use for these applications requires more care and maintenance.

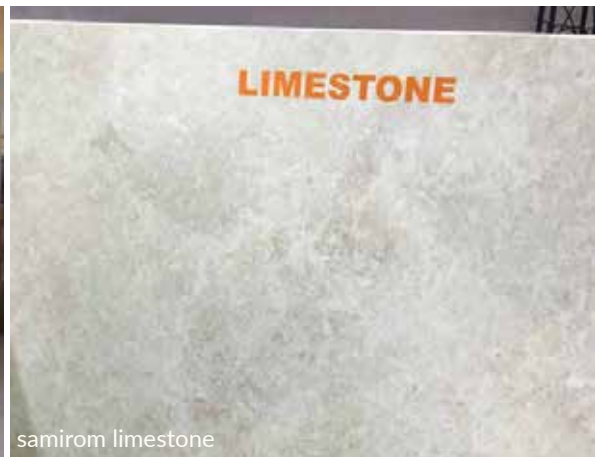

Pietra grey Marble

Cream Marble

Gohare Limestone

samirom limestone

# ONYX

You can choose from pastel shades of golden honey, greens, smoky greys and a deep amber. The bands or lines of contrasting color running throughout the stone contribute to its unique characteristics. Similar to marble, onyx can be finished with a polished or honed surface.

Golden Honey Onyx

White Onyx

Deep Amber Onyx

Cherry blossom Onyx

# ONYX

This natural stone has beautiful, translucent and contrasting colours. The colours of onyx are soft and sensuous, bold and beautiful and work best when used under lighting or back lighting to draw attention to these translucent qualities.

Multi color Onyx

Orange Honey

White Honey

Green Onyx

## PACKING

Usually suppliers load 22 up to 28 wooden Worthy Wooden Crates & covered by nylon to the 20 Ft containers. The numbers vary due to the size of the crates.

Pine wood should be used in the crates so that you can be sure that you will receive the materials with unbroken crates.

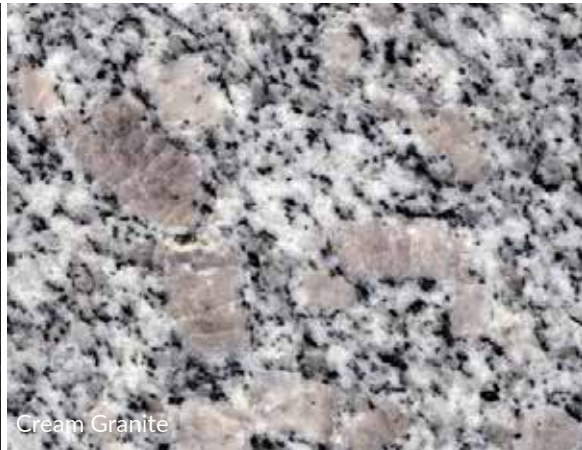

# GRANITE

Granite is an igneous rock that is the result of hundreds of millions of years of creation. Nature has given us this exceptional product with its multitude of colours and we are forever learning how to use and enjoy it. It is among the hardest of natural stones and is used for many applications including structural works due to its high compressive strength and durability.

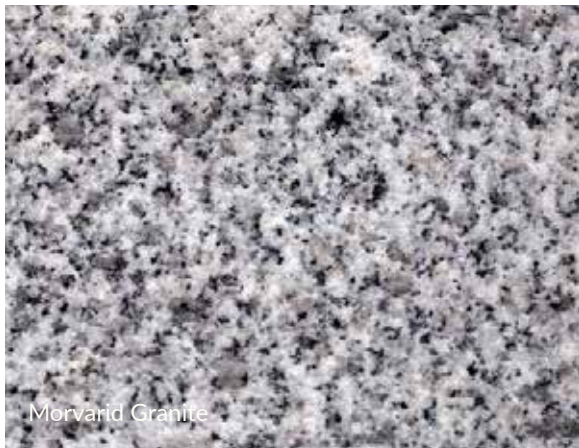

Granite is composed of feldspars, mica and other minerals and the combination of all these and the heat of the forming earth on various continents of this planet has, contributed to the many colours and textures of granite. Granites rich colours and density make it an ideal stone for many applications. Typically you will find granite used for flooring, countertops, vanities, furniture and of course as exterior cladding. Its superior strength and permanence of finish in extreme environments make it one of the most sought after building 'finishing' products.
